Claims 1-11, 16, and 22 have been cancelled. Claims 12-15, 17-21, and 23-31 remain.

Claim 18 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 18 depends from cancelled claim 16.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 12-15, 17-21, and 23-31 are rejected under 35 U.S.C. 102(b) as being anticipated by Goates. Goates shows a control plate with a valve seat in plate 118' and another seat above the ball 120 in control duct 124. With respect to claim 1, the lower end of passage 124 is seen as the first end, and the upper end of the passage is seen as the second end, which opens exclusively into a transverse duct 122 which also leads to further duct 132. The ball is capable of seating against passage 124 or seat in plate 118', thus controlling flow in those two passages, as well as affecting flow in passage 132. All 3 passages are found at least partially in a control plate (seen as the upper plate and middle plate joined).

Regarding claims 16-17 and 22-23, the recited transverse passage is seen as along the top of plate 118' connecting to the second duct. Regarding claim 19 and 25-26, it is not seen how "rebound" provides a structural limitation. Regarding claims 18 and 24 (assuming claim 18 should depend from claim 1), the transverse passage ultimately leads to a clutch piston (in clutch 28), which is seen as a metal plate.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 18 as understood and claim 24 are alternatively rejected under 35 U.S.C. 103(a) as being unpatentable over Goats. It would have been obvious to form transverse to intersect another passage leading to clutch 28, and then close the transverse passage just beyond the intersection with a metal plate.

Applicant's arguments filed 8 July 2008 have been fully considered but they are not persuasive. With respect to passage 124 not having a second end, it is submitted that any passage has at least two ends in order to be called a passage. Furthermore, the valve seat directly below the ball is seen as a first end, and the area above the ball is seen as a second end.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
